A Man of His Own-Susan Wilson 2013-09-24 Rick Stanton was a promising professional baseball player with dreams of playing in the major leagues and starting a family with his young wife, Francesca, when World War II changed everything. Rick returns from the war with his body broken and his dreams shattered. But it was not just body and spirit he sacrificed for the war. He and Francesca volunteered their beloved dog, Pax, for the Army’s K-9 Corp, not knowing if they’d ever see him again. Keller Nicholson is the soldier who fought the war with Pax by his side, and the two have the kind of profound bond that can only be forged in war.
Pax is the closest Keller has to a sense of family, and he can’t bear the thought of returning him to the Stantons. But Rick and Francesca refuse to give him up. Instead, an arrangement is made: Keller will work as Rick’s live-in aide. And thus an unlikely family is formed, with steadfast Pax at the center. As they try to build a new life out of the ashes, Keller and Francesca struggle to ignore their growing attraction to each other, and Rick, believing that he can no longer give Francesca what she needs and wants, quietly plans a way out. All three of them need healing. All three of them are lost. And in Susan Wilson’s A Man of His Own, Pax, with his unconditional love and unwavering loyalty, may be the only one who can guide them home.

Ecology and Historical Materialism—Jonathan Hughes
2000-07-03 This book challenges the widely-held view that Marxism is unable to deal adequately with environmental problems. Jonathan Hughes considers the nature of environmental problems, and the evaluative perspectives that may be brought to bear on them. He examines Marx’s critique of Malthus, his method, and his materialism, interpreting the latter as a recognition of human dependence on nature. Central to the book’s argument is an interpretation of the development of the productive forces which takes account of the differing ecological impacts of different productive technologies while remaining consistent with the normative and explanatory roles that this concept plays within Marx’s theory. Turning finally to Marx’s vision of a society founded on the communist principle to each according to his needs, the author concludes that the underlying notion of human need is one whose satisfaction presupposes only a modest and ecologically feasible expansion of productive output.

Fire and Fury - D a Galante 2020-10-21

Sunshield - Emily B. Martin 2020-05-26 A lawless wilderness. A polished court. Individual fates, each on a quest to expose a system of corruption. The desolate canyons of Alcoro—and the people desperate enough to hide there—couldn’t be more different from the opulent glass palace and lush forests of Moquoia. But the harsh desert and gleaming court are linked through their past, present, and future: a history of abductions in the desert to power Moquoia’s quarries and factories, and a bleak, inhumane future built on the sweat and sacrifice of these bond laborers. But events unfolding in the present could change everything. In the desert, outlaw Lark—known to most as the Sunshield Bandit—has built a name for herself attacking slavers’ wagons and freeing the captives inside. But while she shakes the foundation of Moquoia’s stratified society, she also has to fight to protect her rescues—and herself—from the unforgiving world around them. In the Moquoian court, young ambassador Veran hopes to finally make his mark by dismantling the unjust labor system, if he can navigate the strict hierarchy and inexplicable hostility of the prince. And caught in the middle of it all, Tamsin is trapped within four walls, the epicenter of a secret political coup to overthrow the Moquoian monarchy and perpetuate the age-old system of injustice. Separated by seas of trees and sand, the outlaw, the diplomat, and the prisoner are more connected than anyone realizes. Their personal fates might just tip the balance of power in the Eastern World—if that very power doesn’t destroy them first.

Controllability of Singly Perturbed Linear Time Delay Systems- Valery Y. Glizer

Giuseppe Domenico Scarlatti (1685-1757) was one of the few Baroque composers to transition into the Classical period. Scarlatti composed operas, cantatas, symphonias and liturgical pieces, but his 555 keyboard sonatas are most well-known; a vast collection of single movements in binary form. Lily Afshar’s arrangement of Sonata K. 11 (a favorite of Segovia) utilizes staccato articulation reminiscent of the harpsichord and other techniques including cross-string trills and minimal slurs. The pair of sonatas work well together, written in E minor and E major. Sylvius Leopold Weiss (1687-1750) was the most accomplished lutenist of the Baroque period and the most prolific composer of lute music, writing over one thousand pieces for the instrument. The four pieces arranged in this book show the beautiful polyphony and fantastical writing of Weiss. Afshar utilizes campanella (cross-string) fingerings throughout to emphasize the musical line and produce a fuller sound on the instrument.
