The UNHCR and Disaster Displacement in the 21st Century-Sinja Hantscher 2019-07-18 This book offers an in-depth case study on the leading international refugee agency, the United Nations High Commissioner for Refugees (UNHCR), and its approach to environmentally displaced persons. The author examines the UNHCR on the basis of expert interviews and content analysis in order to highlight why and how the organization is addressing the issue. The analysis draws on organizational as well as security theory, offering readers a better understanding of the connection between the two. The book appeals to scholars in the fields of migration and organizational studies, as well as policymakers and professionals working in international organizations.

Creating Value from Data Sharing-Anne Drieller 2018-08-14 Anne Drieller shows that data sharing offers great opportunities and huge value creation potential for the business world. Despite many opportunities that data sharing promises, the business world has not fully operationalized this fact yet, due to various existing challenges. Thus, an exemplary, future-oriented, and platform-based data sharing business model is developed for the startup Queemey. This business model is also equipped with prioritized implementation advice, including measures like focusing on strong values for all platform participants, growing their business into a powerful monopolist position, and eliminating barriers of technological, contractual and legal or data privacy uncertainties.

The New Dialectic-Douglas N. Walton 1998-01-01 Because developments in informal logic have been based, for the most part, on idealized and abstract models, the tools available for argument analysis are not easily adapted to the needs of everyday argumentation. In this book Douglas Walton proposes a new and practical approach to argument analysis based on his theory that different standards for argument must apply in the case of different types of dialogue. By refining and extending the existing formal classifications of dialogue, Walton shows that each dialogue type, be it inquiry, negotiation, or critical discussion, has its own set of goals. He goes on to demonstrate that an argument can best be evaluated in terms of its contribution, positive or negative, to the goals of the particular dialogue it is meant to further. In this way he illustrates how argument can be brought into the service of many types of dialogue, and thus has valuable uses that go well beyond the mere settling of disputes and differences. By reaching back to the Aristotelian roots of logic as an applied, practical discipline and by formulating a new framework of rationality for evaluating arguments, Douglas Walton restores a much-needed balance to argument analysis. This book complements and extends his Argument Structure: A Pragmatic Theory (University of Toronto Press, 1996).

Hurricane Harvey's Aftermath-Kevin M. Fitzpatrick 2020-08-11 Heartbreaking stories from survivors along the Texas Gulf Coast Hurricane Harvey was one of the worst American natural disasters in recorded history. It ravaged the Texas Gulf Coast, and left thousands of people homeless in its wake. In Hurricane Harvey's Aftermath, Kevin M. Fitzpatrick and Matthew L. Spailek offer first-hand accounts from survivors themselves, providing a rare, on-the-ground perspective of natural disaster recovery. Drawing on interviews from more than 350 survivors, the authors trace the experiences of individuals and their communities, both rich and poor, urban and rural, white, Latinx, and Black, and how they navigated the long and difficult road to recovery after Hurricane Harvey. From Corpus Christi to Galveston, they paint a vivid, compelling picture of heartache and destruction, as well as resilience and recovery, as survivors slowly begin rebuilding their lives and their communities. An emotionally provocative read, Hurricane Harvey's Aftermath provides insight into how ordinary people experience and persevere through a disaster in an age of environmental vulnerability.

Henry J. Kaiser-Mark S. Foster 2012-06-15 In the 1940s Henry J. Kaiser was a household name, as familiar then as Warren Buffett and Donald Trump are now. Like a Horatio Alger hero, Kaiser rose from lower-middle-class origins to become an enormously wealthy entrepreneur, building roads, bridges, dams, and housing. He established giant businesses in cement, aluminum, chemicals, steel, health care, and tourism. During World War II, his companies built cargo planes and Liberty ships. After the war, he manufactured the Kaiser-Frazer automobile. Along the way, he also became a major force in the development of the western United States, including Hawaii. Henry J. Kaiser: Builder in the Modern American West is the first biography of this remarkable man. Drawing on a wealth of archival material never before utilized, Mark Foster paints an evenhanded portrait of a man of driving ambition and integrity, perhaps the ultimate "can-do" capitalist. He covers Kaiser's entire life (1882-1967), emphasizing many business ventures. He demonstrates that Kaiser was the prototypical "frontier" entrepreneur who often used government and union support to tame the "wilderness." Though today the Kaiser industries are no longer under family management, the Kaiser legacy remains great. Kaiser played a major role in building the Hoover Dam, Bonneville, Grand Coulee, and Shasta dams. The Kaiser-Permanente Medical Care Program still provides comprehensive health care for millions of subscribers. Kaiser-planned communities remain in Los Angeles; San Francisco; Portland, Oregon; and Boulder City, Nevada. Kaiser Engineers was actively engaged in hundreds of huge construction jobs across the nation and around the world. U.S. and business historians, scholars of the modern West, and general readers will all find much to absorb them in this well-written biography.

Détenue-Richard Crowder 2020-09-17 Between 1968 and 1975, there was a subtle thawing of relations between East and West, for which Brezhnev coined the name Détente, and – perhaps – a chance to end the Cold War. The leaders of the United States and the Soviet Union, Richard Nixon and Leonid Brezhnev, hoped to forge a new relationship between East and West. Yet, the greatest changes of the era took place outside the sphere of international diplomacy. The 1960s brought social collision across the world, from the anti-war protests in America to the student demonstrations on the streets of Paris, and Mao Tse-tung's Red Guards in China. A new generation, whom advertising executives dubbed the baby-boomers, brought new attitudes to towards sex, gender, race, the environment and religion. In this book, Richard Crowder explores the years of Détente, and introduces us to the key players of the era, whose stories form the narrative of this book.

The 2-Hour Job Search-Steve Dalton 2012-03-06 A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet’s sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffective and frustrating process.

Modern Diplomacy in Practice-Robert Hutchings 2019-09-27 This textbook, the first comprehensive comparative study ever undertaken, surveys and compares the world’s ten largest diplomatic services: those of Brazil, China, France, Germany, India, Japan, Russia, Turkey, the United Kingdom, and the United States. Chapters cover the distinctive histories and cultures of the services, their changing role in foreign policy making, and their preparations for the new challenges of the twenty-first century.

The Medical Interview-Mack Jr. Lipkin 2012-12-06 Primary care medicine is the new frontier in medicine. Every nation in the world has recognized the necessity to deliver personal and primary care to its people. This book includes first-contact care, care based in a posite tive and caring personal relationship, care by a single healthcare pro vider, advocacy for the patient by the pro vider, the provision of preventive care and psychosocial care, as well as care for episodes of acute and chronic illness. These facets of care work most effectively when they are embedded in a coherent integrated approach. The support for primary care derives from several significant trends. First, technologically based care costs have rocketed beyond reason or availability, occurring in the face of exploding populations and diminish ing real resources in many parts of the world, even in the wealthier nations. Simultaneously, the primary care disciplines-general internal medicine and pediatrics and family medicine-have matured significantly.

Informal Ethnic Entrepreneurship-Veland Ramadani 2018-10-03 This book presents a curated collection of research on ethnic entrepreneurship, focusing on the informal sector. The common theme of the expert contributions is that entrepreneurial motivations and practices are not limited to formal business is paramount to ethnic groups. In particular, the book explores the factors influencing ethnic groups to start informal businesses and how this creates innovative business activity. It also charts the evolution of ethnic entrepreneurship and informal businesses in advanced and emerging economies; the diversity of entrepreneurial strategies; the economics of co-ethnic employment; and the issues surrounding immigrant entrepreneurship. The book is a valuable resource for researchers in the field of informal ethnic entrepreneurship, as well as for policy makers and entrepreneurs.

Reclaiming History: The Assassination of President John F. Kennedy- Vincent Bugliosi 2005-07-17 For fifty years the truth about the assassination of President John F. Kennedy has been obscured. This book releases us from a crippling distortion of American history. At 1:00 p.m. on November 22, 1963, President John F. Kennedy was pronounced dead, the victim of a sniper attack during his motorcade through Dallas. This was the only fact generally agreed upon in the vast literature spawned by the assassination. National polls reveal that an overwhelming majority of Americans (75%) believe that there was a high-level conspiracy behind Lee Harvey Oswald. Many even believe that Oswald was entirely innocent. In this continuously absorbing, powerful, ground-breaking book, Vincent Bugliosi shows how we have come to believe such lies about an event that changed the course of history. The brilliant prosecutor of Charles Manson and the man who forged an iron-clad case of circumstantial guilt around O. J. Simpson in his best-selling Outrage Bugliosi is perhaps the only man in America capable of writing the definitive book on the Kennedy assassination. This is an achievement that has for years seemed beyond reach. No one imagined that such a book would ever be written: a single volume that once and for all, resolves, beyond any reasonable doubt, every lingering question as to what happened in Dallas and who was responsible. There have been hundreds of books about the assassination, but there has never been a book that covers the entire case, including addressing every piece of evidence and each and every conspiracy theory, and the facts, or alleged facts, on which they are based. In this monumental work, the author has raised scholarship on the assassination to a new and final level, one that surpasses all other books on the subject. It adds resonance, depth, and closure to the admirable work of the Warren Commission. Reclaiming History is a narrative compendium of fact, forensic evidence, reexamination of key witnesses, and common sense. Every detail and nuance is accounted for, every conspiracy theory revealed as a fraud on the American public. Bugliosi’s irresistible logic, command of the evidence, and ability to draw startling inferences shed fresh light on this American nightmare. At last it all makes sense. A Man Alone-AndrÁ© Chouraqui 1970-01-01 In writing this biography of Theodor Herzl, Chouraqui has filled a vital need: he shows Herzl’s visionary in the context of turn-of-the-century Europe. The book, presented in novel form, is largely based on historical sources. The result is a compassionate, human account of how the idea of a Jewish state was born, and of Herzl’s struggle to make his dream become reality. Andre Chouraqui is an Israeli public figure and author whose works have been translated into several languages. He served as personal adviser to Prime Minister David Ben Gurion and was deputy mayor of Jerusalem from 1965 to 1969.
Human-Machine Shared Contexts—William Lawless 2020-06-10 Human-Machine Shared Contexts considers the foundations, metrics, and applications of human-machine systems. Editors and authors debate whether machines, humans, and systems should speak only to each other, only to humans, or to both and how. The book establishes the meaning and operation of “shared contexts between humans and machines; it also explores how human-machine systems affect targeted audiences (researchers, machines, robots, users) and society, as well as future ecosystems composed of humans and machines. This book explores how user interventions may improve the context for autonomous machines operating in unfamiliar environments or when experiencing unanticipated events; how autonomous machines can be taught to explain contexts by reasoning, inferences, or causality, and decisions to humans relying on intuition; and for mutual context, how these machines may interdependently affect human awareness, teams and society, and how these “machines” may be affected in turn. In short, can context be mutually constructed and shared between machines and humans? The editors are interested in whether shared context follows when machines begin to think, or, like humans, develop subjective states that allow them to monitor and report on their interpretations of reality, forcing scientists to rethink the general model of human social behavior. If dependence on machine learning continues or grows, the public will also be interested in what happens to context shared by users, teams of humans and machines, or society when these machines malfunction. As scientists and engineers “think through this change in human terms,” the ultimate goal is for AI to advance the performance of autonomous machines and teams of humans and machines for the betterment of society wherever they may interact with humans or other machines. This book will be essential reading for professional, industrial, and military computer scientists and engineers; machine learning (ML) and artificial intelligence (AI) scientists and engineers, especially those engaged in research on autonomy, computational context, and human-machine shared contexts; advanced robotics scientists and engineers; scientists working with or interested in data issues for autonomous systems such as with the use of scarce data for training and operations with and without user interventions; social psychologists, scientists and physical research scientists pursuing models of shared context; modelers of the internet of things (IOT); systems of systems scientists and engineers and economists; scientists and engineers working with agent-based models (ABMs); policy specialists concerned with the impact of AI and ML on society and civilization; network scientists and engineers; applied mathematicians (e.g., holon theory, information theory); computational linguists; and blockchain scientists and engineers. Discusses the foundations, metrics, and applications of human-machine systems Considers advances and challenges in the performance of autonomous machines and teams of humans Debates theoretical human-machine ecosystem models and what happens when machines malfunction

EG-ICE 2021 Workshop on Intelligent Computing in Engineering—Abualdenien, Jimmy 2021-08-06 The 28th EG-ICE International Workshop 2021 brings together international experts working at the interface between advanced computing and modern engineering challenges. Many engineering tasks require open-world resolutions to support multi-actor collaboration, coping with approximate models, providing effective engineer-computer interaction, searching high-dimensional solution spaces, accommodating uncertainty, including specialist domain knowledge, performing sensor-data interpretation and dealing with incomplete knowledge. While results from computer science provide much initial support for resolution, adaptation is unavoidable and most importantly, feedback from addressing engineering challenges drives fundamental computer-science research. Competence and knowledge transfer goes both ways. Der 28. Internationale EG-ICE Workshop 2021 bringt internationale Experten zusammen, die an der Schnittstelle zwischen fortgeschrittenen Datenverarbeitung und modernen technischen Herausforderungen arbeiten. Viele ingenieurwissenschaftliche Aufgaben erfordern Open-World-Lösungen, um die Zusammenarbeit mehrerer Akteure zu unterstützen, mit approximativen Modellen umzugehen, eine effektive Interaktion zwischen Ingenieur und Computer zu ermöglichen, in mehrdimensionalen Lösungsräumen zu suchen, Unsicherheiten zu berücksichtigen, einschließlich fachspezifischen Domänenwissens, Sensordateninterpretation durchzuführen und mit unvollständigem Wissen umzugehen. Während die Ergebnisse aus der Informatik anfänglich viel Unterstützung für die Lösung bieten, ist eine Anpassung unvermeidlich, und am wichtigsten ist, dass das Feedback aus der Bewältigung technischer Herausforderungen die computer-wissenschaftlichen Grundlagenforschung voranbringt. Kompetenz und Wissenstransfer gehen in beide Richtungen.

Twenty Ways to Assess Personnel—Adrian Furnham 2021-07-01 Over the years, there has been more and more research to test the validity of personnel assessment methods, an area which is far from easy. This book compares traditional practices against new techniques, including social media analytics, wearables, mobile phone logs, and gamification. Researchers and businesses alike know the importance of making good, and avoiding bad, selection decisions, but are unsure of how to proceed effectively. This book maps out the viable options and advises on best practice. The author combines both practical applications and academic, psychological research to explain how each method works, the theory behind it, and the extent of the evidence that supports it.

Doubting Toward Faith—Bobby Conway 2015 This how-to-on handling doubt demonstrates how your doubts can deepen your dependence on God, develop your sense of empathy for others, and motivate you to find satisfying answers to life’s biggest questions. Discover how your doubts can propel you in the right direction—toward faith.

Multidisciplinary Medico-Legal Death Investigation—Lakshman Sathyavagiswaran 2018-05-31 Multidisciplinary Medico-legal Death Investigation: Role of Consultants is the only book in the field that focuses on the role consultants have in medical examiner/coroner offices. The book provides a multidisciplinary view on the topic by including specialized fields, such as anesthesiology, surgery, radiology, including CT scan, pediatrics, cardiac-electrophysiology, cardiac pathology, forensic anthropology and odontology, firearms examination, firearms, eye pathology and psychiatry/psychology. Coverage also includes chapters on specialized topics, including high profile cases, the media, business continuity planning, environments, the importance of quality assurance and peer review, and quality assurance in a medico-legal death investigation office. This one-of-a-kind resource is ideal for those in the medico-legal death investigation field and professionals in the criminal and civil justice system. Covers many fields, including anesthesiology, surgery, and radiology, including CT scan, pediatrics, cardio-electrophysiology, cardiac pathology, forensic anthropology and odontology, firearms examination, and more Includes contributions by world-renowned specialists Presents comprehensive case studies and examples of consultation reports

China’s Urban Christians—Brent Fulton 2016-12-29 China’s Urban Christians: A Light at Cannot Be Hidden looks at how massive urbanization is redrawing not only the geographic and social landscape of China, but in the process is transforming China's growing church as well. The purpose of this book is to explore how Christians in China perceive the challenges faced by their new urban context and to examine their proposed means of responding to these challenges. Although not primarily political in nature, these challenges nonetheless illustrate the complex interplay between China’s Christian community and the Chinese party-state as it comes to terms with the continued growth and increasing prominence of Christianity in modern China.

Their Last Battle—Nicolaus Mills 2009-04-29 On Memorial Day weekend in 2004, the National World War II Memorial on the Mall in Washington will officially open to the public. What began as a casual conversation between a Congresswoman and one of her constituents in 1987 grew into a struggle that lasted more than four times longer than it took America to fight the war itself. Its rocky progress to completion is a compelling story about how America chooses to memorialize its past and how we view World War
II. Nicolaus Mills recounts the development of the Washington Mall, from its time as swampland to Southern outrage over the Lincoln Memorial to Maya Lin's controversial Vietnam Veterans' Memorial. The World War II Memorial would prove just as controversial; it took the support of WW II vet Bob Dole and actor Tom Hanks to overrule the strong objections of interest groups, self-appointed art critics, and others. In Their Last Battle, a story vividly narrated through interviews with politicians and vets, architects and citizens, Mills discovers what a public monument can tell us about America and the values it honors.

Wilhelm II—John C. G. Röhl 2014-02-06 This final volume of John Röhl's acclaimed biography of Kaiser Wilhelm II reveals the Kaiser's central role in the origins of the First World War. The book examines the Kaiser's part in the Boer War, the Russo-Japanese War, the naval arms race with Britain and Germany's rivalry with the United States as well as in the crises over Morocco, Bosnia and Agadir. It also sheds new light on the public scandals which accompanied his reign from the allegations of homosexuality made against his intimate friends to the Daily Telegraph Affair. Above all, John Röhl scrutinizes the mounting tension between Germany and Britain and the increasing pressure the Kaiser exerted on his Austro-Hungarian ally from 1912 onwards to resolve the Serbian problem. Following Germany's defeat and Wilhelm's enforced abdication, he charts the Kaiser's bitter experience of exile in Holland and his frustrated hopes that Hitler would restore him to the throne.

Understanding Health Care Outcomes Research—Robert L. Kane 2004 Eleven American academics, physicians, and health services researchers contribute ten chapters examining the important issues that surround outcomes research, in a text for health services researchers and clinicians who utilize patient-centered outcomes information in the context of care. The Executive Architect—John E. Harrigan 1996-03-27 "We cannot continue to accept the view that when times are good we will prosper and when times are bad we will suffer. . . . We must move from a business of commissioned services to one of direct participation in all our clients' endeavors, where productive participation establishes us as trusted partners, the currency for continuing relationship."—John E. Harrigan and Paul R. Neel In their drive to compete effectively in the emerging world economic order, today's enterprise organizations are undergoing a period of radical redesign, restructuring, and redefinition. Asthey do so, they are coming to rely more and more upon design professionals to help them build their roads to the future. This means that unlimited opportunities now await the architect who can look beyond the everyday aspects of professional practice and learn as much as possible about his or her clients' worlds. But forging enduring partnerships with clients requires more than just proven design skills on the part of an architect. Today's successful architect is as much a business executive as an artist. He or she is conversant in an array of core business skills—including marketing, client relations, leadership, strategic management, and others—rarely covered in professional education programs. Based, in large part, upon Professor John E. Harrigan's innovative executive program for architects at California Polytechnic State University, The Executive Architect fills that critical gap in professional education. In addition to schooling designers in a wide range of crucial business concepts, tools, and techniques, it provides a complete blueprint for transforming a practice from one based on the fulfillment of commissioned services to one based on ongoing engagement with every aspect of clients' worlds—their goals, risks, opportunities, and unique corporate cultures. In creating this innovative guide, authors Harrigan and Neel draw on the experiences of more than a dozen of the nation's most respected executive architects, including Arthur Gensler, Charles Luckman, and Judy Rowe. Throughout the book, these industry leaders offer their insights, advice, and guidance on a wide range of topics, from leadership to benchmarking, from forming strategic partnerships to building knowledge base systems. Also featured throughout the book are numerous instructive case studies. Based on the Harvard Business School model, these studies present a broad array of successful decision-making examples. The Executive Architect helps designers acquire the skills needed to expand beyond the boundaries of current practice and to exploit the unlimited opportunities and challenges of doing business in the new world economic order.
